

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

uliginosa Hedw., *Mnium affine* Bl., *Philonotis calcarea* Schimp. *Ph. uncinata* Brid., *Physcomitrium pygmaeum* James, *Pogonatum alpinum Macounii* Frye, *Polytrichum Jensenii* Hag., *Rhacomitrium protensum* A. Br., *Seligeria calcarea* B. & S., *S. pusilla* B. & S., *Splachnum Wormskjoldii* Hornem., *Tayloria serrata* B. & S., *Tetraplodon mnioides* B. & S., *Tortula montana* Lindb. The *Polytrichum* and the *Splachnum* are Swedish, not North American, material. It is gratifying to note the large number of individual collectors that have contributed to this fascicle, which fully maintains the high standard set by the author in the previous issues.

SULLIVANT MOSS SOCIETY NOTES

The Brooklyn Botanic Garden announces to members of the Sullivant Moss Society, and to all others interested in the study of mosses that the entire herbarium and library of Mrs. Annie Morrill Smith, presented to the Botanic Garden in 1914, are available for consultation at the Garden. Both the library and the herbarium are kept separate from the general collections of the Garden, but may be consulted at any time upon application to the curator in charge. The Garden is desirous of increasing its bryological collections and library and will be pleased to enter into correspondence with bryologists and collectors with a view to exchange of publications or of specimens.

We are pleased to announce that since the publication of the last revision of the list of members Dr. W. H. Emig, Assistant Professor of Botany at the University of Pittsburgh, Pa., has joined the Moss Society.
